

FSS GROUP OF COMPANIES

COMPANY / CAPABILITY OVERVIEW

Fire System Services is a comprehensive solutions provider specialising in Essential Safety Provisions (ESP's) of fire equipment maintenance and fire safety equipment procurement.

Fire System Services holds FPAS accreditation, this ensures our clients that all our technicians are fully competent and holding a CERT ii in fire safety maintenance.

Aviation Fire Systems Australia was established to provide Aircraft Component Maintenance Services in the field of Aircraft Fire and Safety and Life Support Services.

National Hydro Cylinder Testing Services is a licenced test facility managed by Fire System Services. At National Hydro Cylinder Testing Services we test and certify a vast array of high-pressure cylinders. We are able to carry out Hydrostatic or Non-Destructive Eddy Current Tests.

All three divisions work across the private sector, State and Commonwealth Governments including The Department of Defence providing asset procurement and component maintenance services.
